RE: PARENTERAL PENTOXIFYLLINE

DATE: 11/10/92

This is to inform you that we are no longer able to supply parenteral Pentoxifylline to the FHCRC. This action is related to a supply issue, not a safety issue. The protocols that will be effected are #601, #654 and #176.5. I have requested that the Protocol Development Office remove the IV PTX portion from these protocols and informed consents.

I will contact the Investigational Drug Service for the return of the remaining 47 ampules of PTX. I will also be requesting a complete list of all patients who received parenteral PTX on this physician-sponsored IND.

Thank you.
