San Francisco 49ers get results with the PAP-IMI

The San Francisco 49ers Football Team is the first authorized PAP-IMI study site in major league sports. They have had their PAP-IMI since October 2002, when Bio-Energy Sports Marketing Director Josh Silver spent three weeks with the team and their now retired head trainer - the legendary Lindsay McLean.

Since that time, 49ers trainers Todd Lazenby, Jeff Tanaka and Dionne Calhoun have gone through PAP-IMI training and have used the PAP-IMI to treat a wide range of injuries and ailments, including sprains, breaks and bruises.

As you can tell by some of the following quotes, 49ers players swear by the device they have affectionately nicknamed "the Thumper," lining up before and after games and practices to use it.

"I had a real sore heel. After one treatment I said "What did you do? My heel never felt this good!" I noticed a major difference the next morning after treatment"
